EDUCATION

University of Texas at Austin — Austin, Texas

B.S. Data Science, GPA: 3.7/4.0 — Aug 2025

Certificate in Scientific Computation, Certificate in Computer Science

- **Coursework:** Software Design I-II, Machine Learning, Linear Algebra, Data Science, Discrete Math, Stochastic Processes
- **Activities:** Texas Venture Labs, UT Competitive Programming, Longhorn Math, UT ML/DS, UT Putnam

WORK EXPERIENCE

Mintlify — San Francisco, California

Growth Engineer — Jun 2026 - Present

- Designed and iterated on LLM-based autonomous agents for application triage, scoring, and routing, integrating full-stack internal applications to streamline growth operations
- Managed end-to-end data pipeline of Open Source and Startup programs per day, validating outputs, refining evaluation heuristics, and improving automation accuracy under head of engineering

Dell Technologies — Austin, Texas

Account Executive — Infrastructure Solutions Group — Aug 2025 – May 2026

- Top-scoring account manager in 60-person cohort, including sole manager of Pegatron (approx $5.87 billion account), over-attained Q1 F27 at 212% by leveraging server infrastructure for AI enablement
- Developed an internal LLM agent automating outbound emails, presented to director of software and Dell AI team.

Avathon — Austin, Texas

AI Engineer — Founding Team — Jan 2025 – Jul 2025

- One of five AI engineers at Avathon, spearheading generative AI adoption across non-technical stakeholders, translating LLM-driven workflows into $10M+ contracts with Coca-Cola, UBS, Shell, and Lockheed Martin
- Sole engineer architecting and fine-tuning open source LLM (Qwen3-30B) with custom RLHF pipelines, upskilled support team on enterprise-grade LLM development and deployment through initiating and leading weekly cross-team meetups

United States Space Force — Pentagon - Arlington, VA

Data Science Intern — May 2024 – Aug 2024

- Rearchitected ETL with Databricks Delta Lake and PySpark, building Tableau/Plotly dashboards for Secretary of Cost.
- Modernized analysis of $49B in space contracts from Excel processes, enhancing reporting consistency and efficiency.

Baylor College of Medicine Head and Neck Cancer Research Lab — Houston, Texas

Undergraduate Bioinformatics Research Assistant — Jan 2019 – May 2023

- Co-authored three peer-reviewed publications using my software, including Nature's 'Evolution of Cisplatin Resistance'.
- Developed vcfeather, a genomics processing library in PyTorch, used to determine patient drug trial candidacy

PROJECTS

Mintlify OSS Reviewer Agent — Jul 2026

Solo Engineer - In-production Agent

- Built an agent that reviews Github repositories of submissions for Mintlify's OSS program to determine if they should be admitted, constructed with Exa, CrewAI, and NodeJS

Nvidia Sponsored Robotics Cat — Mar 2026

Lead Engineer - Sponsored Product Build

- Architected the software and ML stack for a CAD-designed robotic companion sponsored by Nvidia and Dell, deployed to patients at Dell Children's Medical Center.

SKILLS AND INTERESTS

- **Languages/Software:** Typescript, Python, R, SQL, Git, AWS, Google Cloud Platform
- **Data Science:** Pandas, Snowflake, Databricks, Power BI, Tableau, NumPy, Scikit-learn, PyTorch, Keras, Transformers
